

## CLEANING & INFECTION CONTROL

Rockford Schools partners with KSS Enterprises, Cintas, Imperial Dade, and Action Chemical to implement industry best practices into all of our buildings to provide a clean and safe environment for students, faculty, staff and visitors.

Rockford Schools staff and students work together with local recycling programs at Republic Waste and Paper Gator to collect and process materials that would otherwise be thrown away.

This program not only teaches our students important life skills, it also benefits both the community and the environment!

Students at Parkside Elementary working alongside staff to offer a building wide recycling program.
